RISK FACTORS

There are certain risks inherent in an investment in the securities of the Corporation and in the activities of the Corporation, including the following and other risks discussed elsewhere in this Annual Information Form, which investors should carefully consider before investing in securities of the Corporation. This description of risks does not include all possible risks, and there may be other risks of which the Corporation is not currently aware.

Power is a holding company whose principal asset is its controlling interest in Power Financial. Power Financial holds substantial interests in the financial services sector through its controlling interest in each of Lifeco and IGM Financial. As a result, the Corporation bears the risks associated with being a significant shareholder of these holding and operating companies. The risks of being an investor in Power Financial are described in the section entitled “Risk Factors” of Power Financial’s Annual Information Form, which section is incorporated herein by reference; the risks of being an investor in Lifeco are described and referenced in the subsection entitled “Risk Factors” of Lifeco’s Annual Information Form, which subsection and further references are incorporated herein by reference; and the risks of being an investor in IGM Financial are referenced in the last paragraph of the section entitled “Development of the Business Over the Last Three Years” of IGM Financial’s Annual Information Form, which paragraph and further references are incorporated herein by reference.

The share price of Power, Power Financial and its subsidiaries (Lifeco and IGM Financial) may be volatile and subject to fluctuations in response to numerous factors beyond Power’s control. Economic conditions may adversely affect Power and its subsidiaries, including fluctuations in foreign exchange, inflation and interest rates, as well as monetary policies, business investment and the health of capital markets in Canada, the United States, Europe and Asia. In recent years, financial markets have experienced significant price and volume fluctuations that have affected the market prices of equity securities held by the Corporation and its subsidiaries, and that have often been unrelated to the operating performance, underlying asset values or prospects of such companies. These factors may cause decreases in asset values that are deemed to be significant or prolonged, which may result in impairment charges. In periods of increased levels of volatility and related market turmoil, Power’s subsidiaries’ operations could be adversely impacted and the trading price of Power’s securities may be adversely affected.

As a holding company, Power’s ability to meet its obligations, including payment of interest, other operating expenses and dividends, and to complete current or desirable future enhancement opportunities or acquisitions generally depends upon dividends from its principal subsidiaries and other investments and its ability to raise additional capital. Dividends to shareholders of Power will be dependent on the operating performance, profitability, financial position and creditworthiness of the subsidiaries of Power and on their ability to pay dividends to Power. The ability of Power Financial to meet its obligations and pay dividends is dependent in particular upon receipt of dividends from its subsidiaries. The payment of interest and dividends by Power Financial’s principal subsidiaries is subject to restrictions set out in relevant corporate and insurance laws and regulations, which require that solvency and capital ratios be maintained.

If required, the ability of Power to arrange additional financing in the future will depend in part upon prevailing market conditions as well as the business performance of Power and its subsidiaries. There can be no assurance that debt or equity financing will be available, or, together with internally generated funds, will be sufficient to meet or satisfy Power’s objectives or requirements or, if the foregoing are available to Power, that they will be on terms acceptable to Power. The inability of Power to access sufficient capital on acceptable terms could have a material adverse effect on Power’s business, prospects, dividend paying capability and financial condition, and further enhancement opportunities or acquisitions.

Additional information about the risks and uncertainties of the Corporation’s business is provided in the section entitled “Risk Management” in Power’s MD&A, which section is incorporated herein by reference.

GENERAL

The authorized capital of Power consists of an unlimited number of First Preferred Shares (the “First Preferred Shares”), an unlimited number of Participating Preferred Shares (the “Participating Preferred Shares”), and an unlimited number of Subordinate Voting Shares (the “Subordinate Voting Shares”). As at March 18, 2015, there were issued and outstanding:

Share Class	Number of Shares Issued and Outstanding
Non-Participating Shares	
First Preferred Shares	
1986 Series	430,578
Series A	6,000,000
Series B	8,000,000
Series C	6,000,000
Series D	10,000,000
Series G	8,000,000

Participating Preferred Shares	48,854,772
Subordinated Voting Shares	413,568,562

Dividends on the Subordinate Voting Shares, Participating Preferred Shares and First Preferred Shares are payable only as and when declared by the Board of Directors.

SUBORDINATE VOTING SHARES

Each Subordinate Voting Share entitles the holder to one vote at all meetings of shareholders (other than meetings exclusively of another class or series of shares), and subject to the rights of holders of Participating Preferred Shares and the First Preferred Shares, to receive any dividend on such share and to participate equally with all other holders of Subordinate Voting Shares in the remaining property of the Corporation on dissolution or winding-up. Power may not, without approval of two-thirds of the holders of Subordinate Voting Shares, issue any Participating Preferred Shares unless Power contemporaneously with such issue offers to holders of Subordinate Voting Shares the right to acquire from Power *pro rata* to their holdings an aggregate number of Subordinate Voting Shares that is equal to eight and one-third times the number of Participating Preferred Shares proposed to be issued for a consideration per share that is equal to the stated capital amount per share for which the Participating Preferred Shares are to be issued. There are no conversion rights, special liquidation rights, pre-emptive rights or subscription rights attached to the Subordinate Voting Shares.

As at March 18, 2015, the Subordinate Voting Shares represented 45.8 per cent of the aggregate voting rights attached to Power’s outstanding voting securities.

The Articles of Power do not contain any rights or provisions applicable to holders of Subordinate Voting Shares where a takeover bid is made for the Participating Preferred Shares.

PARTICIPATING PREFERRED SHARES

Each Participating Preferred Share entitles the holder to ten votes at all meetings of shareholders (other than meetings exclusively of another class or series of shares), and subject to the rights of holders of the First Preferred Shares, to receive a non-cumulative dividend of \$0.009375 per share per annum before any dividends are paid for the Subordinate Voting Shares, and the further right to participate, share and share alike, with the holders of Subordinate Voting Shares in any dividends that may be paid with respect to the Subordinate Voting

Shares after payment of a dividend of \$0.009375 per share per annum on the Subordinate Voting Shares. Upon any dissolution or liquidation, in whole or in part, of Power or upon any other distribution of capital for the purpose of winding-up Power's affairs, the holders of Participating Preferred Shares, subject to the prior rights of the holders of the First Preferred Shares and by preference over the holders of the Subordinate Voting Shares or any other shares ranking junior to the Participating Preferred Shares, are entitled to receive an amount equal to \$0.421875 per share plus any declared and unpaid dividends. Power may not, without approval of two-thirds of the holders of Participating Preferred Shares, issue any Subordinate Voting Shares unless Power contemporaneously with such issue offers to the holders of Participating Preferred Shares the right to acquire from Power *pro rata* to their holdings an aggregate number of Participating Preferred Shares that is equal to 12 per cent of the number of Subordinate Voting Shares proposed to be issued for a consideration per share that is equal to the average stated capital amount per share for which the Subordinate Voting Shares are to be issued.

FIRST PREFERRED SHARES

The First Preferred Shares may be issued in one or more series with such rights, privileges, restrictions and conditions as the Board of Directors designates. With respect to the payment of dividends and the distribution of assets in the event of the liquidation, dissolution or winding-up of Power, whether voluntary or involuntary, or any other distribution of the assets of Power among its shareholders for the purpose of winding-up its affairs, the First Preferred Shares of each series rank on a parity with the First Preferred Shares of every other series and in priority to the Participating Preferred Shares, the Subordinate Voting Shares and any other shares ranking junior to the First Preferred Shares. Holders of First Preferred Shares of any series shall not be entitled to notice of or to attend or to vote at any meeting of its shareholders except as may be required by law or as specifically provided in the provisions attaching to the First Preferred Shares of such series.

For the Series A, Series B, Series C, Series D and Series G First Preferred Shares (for the purposes of this paragraph, the "Non-Cumulative First Preferred Shares"), in the event of the liquidation, dissolution or winding-up of Power or other distribution of the assets of Power among its shareholders for the purpose of winding-up its affairs, whether voluntary or involuntary, subject to the prior satisfaction of the claims of all creditors of Power and of holders of shares of Power ranking prior to the Non-Cumulative First Preferred Shares, the holders of the Non-Cumulative First Preferred Shares shall be entitled to be paid and to receive an amount equal to \$25.00 per Non-Cumulative First Preferred Share plus declared and unpaid dividends before any amount shall be paid or any assets of Power shall be distributed to the holders of Participating Preferred Shares, Subordinate Voting Shares or of shares of any other class of Power ranking junior to the Non-Cumulative First Preferred Shares.

1986 SERIES FIRST PREFERRED SHARES

Power must make all reasonable efforts to purchase for cancellation on the open market 20,000 1986 Series First Preferred Shares per quarter at a price not exceeding \$50.00 per share. "Prime" means, for any quarterly dividend period, the arithmetic average of the Prime Rates quoted by two reference banks in effect during each day during the three-month period which ends on the last day of the calendar month immediately preceding the applicable dividend payment date in respect of which the determination is being made, and "Prime Rate" is the reference rate as quoted by those two banks for determining interest rates on Canadian dollar commercial loans made to prime commercial borrowers in Canada.

RATINGS

The table below provides the ratings assigned to the Corporation's outstanding securities as at March 27, 2015.

	DBRS Limited ("DBRS")	Standard & Poor's Ratings Services ("S&P")
Issuer rating	-	A
7.57% debentures due April 22, 2019	A (high)	A
8.57% debentures due April 22, 2039	A (high)	A
Preferred shares:		
Cumulative	Pfd-2 (high)	Canadian scale P-2 (High) Global scale BBB+
Non-cumulative	Pfd-2 (high)	Canadian scale P-2 (High) Global scale BBB+

The ratings of the Corporation and its outstanding securities have been assigned a stable trend by DBRS and a stable outlook by S&P.

Credit ratings are intended to provide investors with an independent assessment of the credit quality of an issue or issuer of securities and do not speak to the suitability of particular securities for any particular investor. A security rating is therefore not a recommendation to buy, sell or hold securities and may be subject to revision or withdrawal at any time by the rating agency. The definitions of the categories of each rating set forth below have been obtained from the respective rating agencies' websites.

The Corporation has paid customary rating fees to S&P and DBRS in connection with the above-mentioned ratings. In addition, the Corporation has, in the ordinary course of business, made payments in respect of other services provided to the Corporation by S&P and DBRS during the last two years.

(a) DBRS Limited

In general terms, DBRS ratings are opinions that reflect the creditworthiness of an issuer, a security or an obligation. They are opinions based on forward-looking measurements that assess an issuer's ability and willingness to make timely payments on outstanding obligations (whether principal, interest, dividend, or distributions) with respect to the terms of an obligation.

The DBRS long-term obligation rating scale provides an opinion on the risk of default, which is the risk that an issuer will fail to satisfy its financial obligations in accordance with the terms under which an obligation has been issued. Ratings are based on quantitative and qualitative considerations relevant to the issuer, and the relative ranking of claims.

The DBRS preferred share rating scale is used in the Canadian securities market and is meant to give an indication of the risk that a borrower will not fulfill its full obligations in a timely manner, with respect to both dividend and principal commitments. Every DBRS rating is based on quantitative and qualitative considerations relevant to the borrowing entity.

Most rating categories are denoted by the subcategories "high" and "low". The absence of either a "high" or "low" designation indicates the rating is in the middle of the category. Rating trends provide guidance in respect of DBRS' opinion regarding the outlook for the rating in question, with rating trends falling into one of three categories - "Positive", "Stable" or "Negative". The rating trend indicates the direction in which DBRS considers the rating is headed should present tendencies continue, or in some cases, unless challenges are addressed. In general, the DBRS view is based primarily on an evaluation of the issuing entity itself, but may also include consideration of the outlook for the industry or industries in which the issuing entity operates.

The Corporation's debentures rating of A (high) is the fifth highest of twenty-six ratings used by DBRS for long-term debt. Long-term debt rated "A" is of good credit quality. The capacity for the payment of financial obligations is substantial, but of lesser credit quality than that of "AA" rated entities. Entities in this category may be vulnerable to future events, but qualifying negative factors are considered manageable.

The Corporation's preferred shares rating of Pfd-2 (high) is the fourth highest of sixteen ratings used by DBRS for preferred shares in Canada. Preferred shares with a Pfd-2 (high) rating are of satisfactory credit quality, and protection of dividends and principal is still substantial, but earnings, the balance sheet and coverage ratios are not as strong as Pfd-1 rated companies. Generally, a Pfd-2 rating corresponds with companies whose senior bonds are rated in the "A" category.

(b) Standard & Poor's Ratings Services

An S&P issuer credit rating is a current opinion of an obligor's overall financial capacity (creditworthiness) to pay its financial obligations and focuses on the obligor's capacity and willingness to meet its financial commitments as they come due. It does not apply to any specific financial obligation, as it does not take into account the nature of and provisions of the obligation, its standing in bankruptcy or liquidation, statutory preferences, or the legality and enforceability of the obligation.

In contrast, an issue rating relates to a specific financial obligation, a specific class of financial obligations, or a specific financial program. The rating on a specific issue may reflect positive or negative adjustments relative to the issuer's rating for (i) the presence of collateral, (ii) explicit subordination, or (iii) any other factors that affect the payment priority, expected recovery, or credit stability of the specific issue.

Since there are future events and developments that cannot be foreseen, the assignment of credit ratings is not an exact science and, for this reason, S&P ratings opinions are not intended as guarantees of credit quality or as exact measures of the probability that a particular issuer or particular security issue will default. Instead, ratings express relative opinions about the creditworthiness of an issuer or credit quality of an individual issue, from strongest to weakest, within a universe of credit risk.

Most ratings may be modified by the addition of a plus (+) or minus (-) sign to show relative standing within the major letter rating categories. An S&P rating outlook assesses the potential direction of a long-term credit rating over the intermediate term (typically six months to two years). In determining a rating outlook, consideration is given to any changes in the economic and/or fundamental business conditions. An outlook is not necessarily a precursor of a rating change or future credit watch action.

An S&P issuer rating usually refers to the issuer's ability and willingness to meet senior, unsecured obligations. The Corporation's S&P issuer rating is A. The Corporation's debentures' rating of A is the sixth highest of twenty-two ratings used by S&P in its long-term issue credit rating scale. A long-term debenture rated "A" is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher-rated categories; however, the obligor's capacity to meet its financial commitment on the obligation is still strong.

The S&P Canadian preferred share rating scale serves issuers, investors and intermediaries in the Canadian financial markets by expressing preferred share ratings (determined in accordance with global rating criteria) in terms of rating symbols that have been actively used in the Canadian market over a number of years. A Standard & Poor's preferred share rating on the Canadian scale is a forward-looking opinion about the creditworthiness of an obligor with respect to a specific preferred share obligation issued in the Canadian market, relative to preferred shares issued by other issuers in the Canadian market. There is a direct correspondence between the specific ratings assigned on the Canadian preferred share scale and the various rating levels on the global debt rating scale of S&P. The Canadian scale rating is fully determined by the applicable global scale rating, and there are no additional analytical criteria associated with the determination of ratings on the Canadian scale. It is the

practice of S&P to present an issuer's preferred share ratings on both the global rating scale and on the Canadian national scale when listing the ratings for a particular issuer.

The Corporation's preferred shares' rating of P-2 (High) on S&P's Canadian national preferred share rating scale corresponds to BBB+ on S&P's Global preferred share rating scale. A P-2 (High) rating is the fourth highest of eighteen ratings used by S&P in its Canadian national preferred share rating scale. Correspondingly, a BBB+ rating is the sixth highest of twenty ratings used by S&P in its Global preferred share rating scale. A preferred share rating of BBB+ exhibits adequate protection parameters; however, adverse economic conditions or changing circumstances are more likely to lead to a weakened capacity of the obligor to meet its financial commitments on the obligation.

KCA was de-listed by the TSX on June 30, 2006. The stay of proceedings under the CCAA initial court order expired the same day. On August 6, 2009, the TSX delisted the common shares of Adaltis for failure to meet its continued listing requirements. Between September 2, 2009 and December 4, 2009, cease trade orders were issued in respect of Adaltis by the Securities Administrators in British Columbia, Alberta, Manitoba, Ontario and Québec. The trustee to Adaltis' bankruptcy, RSM Richter Inc. (as it then was), completed its administration of the estate and was discharged on May 13, 2011.
