RISK FACTORS

There are certain risks inherent in an investment in the securities of the Corporation and in the activities of the Corporation, including the following and others disclosed elsewhere in this Annual Information Form, which investors should carefully consider before investing in securities of the Corporation. This description of risks does not include all possible risks, and there may be other risks of which the Corporation is not currently aware.

Power is a holding company whose principal asset is its controlling interest in Power Financial. Power Financial holds substantial interests in the financial services sector through its controlling interest in each of Lifeco and IGM Financial. As a result, investors in Power are subject to the risks attributable to its subsidiaries, including those as the principal shareholder of Power Financial, which in turn has the risks attributable to its subsidiaries, including those as the principal shareholder of each of Lifeco and IGM Financial. The risks of being an investor in Lifeco are described and referenced in the section entitled “Risk Factors” of Lifeco’s Annual Information Form dated February 7, 2013 and the risks of being an investor in IGM Financial are referenced in the last paragraph of the section entitled “Development of the Business” of IGM Financial’s Annual Information Form dated March 21, 2013, which section and further references, in the case of Lifeco, and paragraph, in the case of IGM Financial, are incorporated herein by reference.

As a holding company, Power’s ability to pay interest and other operating expenses and dividends, to meet its obligations and to complete current or desirable future enhancement opportunities or acquisitions generally depends upon receipt of sufficient dividends from its principal subsidiaries and other investments and its ability to raise additional capital. The likelihood that shareholders of Power will receive dividends will be dependent upon the operating performance, profitability, financial position and creditworthiness of the principal subsidiaries of Power and on their ability to pay dividends to Power. The payment of interest and dividends by certain of these principal subsidiaries to Power is also subject to restrictions set forth in insurance, securities and corporate laws and regulations which require that solvency and capital standards be maintained by such companies. If required, the ability of Power to arrange additional financing in the future will depend in part upon prevailing market conditions as well as the business performance of Power and its subsidiaries. In recent years, global financial conditions and market events have experienced increased volatility and resulted in the tightening of credit that has reduced available liquidity and overall economic activity. There can be no assurance that debt or equity financing will be available, or, together with internally generated funds, will be sufficient to meet or satisfy Power’s objectives or requirements or, if the foregoing are available to Power, that they will be on terms acceptable to Power. The inability of Power to access sufficient capital on acceptable terms could have a material adverse effect on Power’s business, prospects, dividend paying capability and financial condition, and further enhancement opportunities or acquisitions.

The market price for Power’s securities may be volatile and subject to wide fluctuations in response to numerous factors, many of which are beyond Power’s control. Economic conditions may adversely affect Power, including fluctuations in foreign exchange, inflation and interest rates, as well as monetary policies, business investment and the health of capital markets in Canada, the United States, Europe and Asia. In recent years, financial markets have experienced significant price and volume fluctuations that have affected the market prices of equity securities held by the Corporation and its subsidiaries, and that have often been unrelated to the operating performance, underlying asset values or prospects of such companies. Additionally, these factors, as well as other related factors, may cause decreases in asset values that are deemed to be significant or prolonged, which may result in impairment losses. In periods of increased levels of volatility and related market turmoil, Power’s subsidiaries’ operations could be adversely impacted and the trading price of Power’s securities may be adversely affected.

Dividends on the Subordinate Voting Shares, Participating Preferred Shares and First Preferred Shares are payable only as and when declared by the Board of Directors.

SUBORDINATE VOTING SHARES

Each Subordinate Voting Share entitles the holder to one vote at all meetings of shareholders (other than meetings exclusively of another class or series of shares), and subject to the rights of holders of Participating Preferred Shares and the First Preferred Shares, to receive any dividend on such share and to participate equally with all other holders of Subordinate Voting Shares in the remaining property of the Corporation on dissolution or winding-up. Power may not, without approval of two-thirds of the holders of Subordinate Voting Shares, issue any Participating Preferred Shares unless Power contemporaneously with such issue offers to holders of Subordinate Voting Shares the right to acquire from Power *pro rata* to their holdings an aggregate number of Subordinate Voting Shares that is equal to eight and one-third times the number of Participating Preferred Shares proposed to be issued for a consideration per share that is equal to the stated capital amount per share for which the Participating Preferred Shares are to be issued. There are no conversion rights, special liquidation rights, pre-emptive rights or subscription rights attached to the Subordinate Voting Shares.

The Subordinate Voting Shares represent 45.7 per cent of the aggregate voting rights attached to Power’s outstanding voting securities.

The Articles of Power do not contain any rights or provisions applicable to holders of Subordinate Voting Shares where a takeover bid is made for the Participating Preferred Shares.

PARTICIPATING PREFERRED SHARES

Each Participating Preferred Share entitles the holder to ten votes at all meetings of shareholders (other than meetings exclusively of another class or series of shares), and subject to the rights of holders of the First Preferred Shares, to receive a non-cumulative dividend of \$0.009375 per share per annum before any dividends are paid for the Subordinate Voting Shares, and the further right to participate, share and share alike, with the holders of Subordinate Voting Shares in any dividends that may be paid with respect to the Subordinate Voting Shares after payment of a dividend of \$0.009375 per share per annum on the Subordinate Voting Shares. Upon any dissolution or liquidation, in whole or in part, of Power or upon any other distribution of capital for the purpose of winding-up Power’s affairs, the holders of Participating Preferred Shares, subject to the prior rights of the holders of the First Preferred Shares and by preference over the holders of the Subordinate Voting Shares or any other shares ranking junior to the Participating Preferred Shares, are entitled to receive an amount equal

to \$0.421875 per share plus any declared and unpaid dividends. Power may not, without approval of two-thirds of the holders of Participating Preferred Shares, issue any Subordinate Voting Shares unless Power contemporaneously with such issue offers to the holders of Participating Preferred Shares the right to acquire from Power *pro rata* to their holdings an aggregate number of Participating Preferred Shares that is equal to 12 per cent of the number of Subordinate Voting Shares proposed to be issued for a consideration per share that is equal to the average stated capital amount per share for which the Subordinate Voting Shares are to be issued.

FIRST PREFERRED SHARES

The First Preferred Shares may be issued in one or more series with such rights, privileges, restrictions and conditions as the Board of Directors designates. With respect to the payment of dividends and the distribution of assets in the event of the liquidation, dissolution or winding-up of Power, whether voluntary or involuntary, or any other distribution of the assets of Power among its shareholders for the purpose of winding-up its affairs, the First Preferred Shares of each series rank on a parity with the First Preferred Shares of every other series and in priority to the Participating Preferred Shares, the Subordinate Voting Shares and any other shares ranking junior to the First Preferred Shares. Holders of First Preferred Shares of any series shall not be entitled to notice of or to attend or to vote at any meeting of its shareholders except as may be required by law or as specifically provided in the provisions attaching to the First Preferred Shares of such series.

For the Series A, Series B, Series C, Series D and Series G First Preferred Shares (for the purposes of this paragraph, the “Non-Cumulative First Preferred Shares”), in the event of the liquidation, dissolution or winding-up of Power or other distribution of the assets of Power among its shareholders for the purpose of winding-up its affairs, whether voluntary or involuntary, subject to the prior satisfaction of the claims of all creditors of Power and of holders of shares of Power ranking prior to the Non-Cumulative First Preferred Shares, the holders of the Non-Cumulative First Preferred Shares shall be entitled to be paid and to receive an amount equal to \$25.00 per Non-Cumulative First Preferred Share plus declared and unpaid dividends before any amount shall be paid or any assets of Power shall be distributed to the holders of Participating Preferred Shares, Subordinate Voting Shares or of shares of any other class of Power ranking junior to the Non-Cumulative First Preferred Shares.

RATINGS

The table below provides the ratings assigned to the Corporation's outstanding securities as at March 22, 2013.

Non-cumulative	Pfd-2 (high)	Canadian scale P-2 (High) Global scale BBB+

The ratings of the Corporation and its outstanding securities have been assigned a stable trend by DBRS and a stable outlook by S&P.

Credit ratings are intended to provide investors with an independent assessment of the credit quality of an issue or issuer of securities and do not speak to the suitability of particular securities for any particular investor. A security rating is therefore not a recommendation to buy, sell or hold securities and may be subject to revision or withdrawal at any time by the rating agency. The definitions of the categories of each rating set forth below have been obtained from the respective rating agencies' Web sites.

The Corporation has paid customary rating fees to S&P and DBRS in connection with the above-mentioned ratings. In addition, the Corporation has, in the ordinary course of business, made payments in respect of other services provided to the Corporation by S&P and DBRS during the last two years.

(a) DBRS Limited

In general terms, DBRS ratings are opinions that reflect the creditworthiness of an issuer, a security or an obligation. They are opinions based on forward-looking measurements and quantitative and qualitative analysis of information that assess an issuer's ability and willingness to make timely payments on outstanding obligations (whether principal, interest, dividend, or distributions) with respect to the terms of an obligation. DBRS applies additional considerations when assessing the credit quality of holding companies.

The DBRS long-term obligation rating scale provides an opinion on the risk of default, which is the risk that an issuer will fail to satisfy its financial obligations in accordance with the terms under which an obligation has been issued. Ratings are based on quantitative and qualitative considerations relevant to the issuer, and the relative ranking of claims.

The DBRS preferred share rating scale is used in the Canadian securities market and is meant to give an indication of the risk that a borrower will not fulfill its full obligations in a timely manner, with respect to both dividend and principal commitments. Every DBRS rating is based on quantitative and qualitative considerations relevant to the borrowing entity.

Most rating categories are denoted by the subcategories "high" and "low". The absence of either a "high" or "low" designation indicates the rating is in the middle of the category. Rating trends provide guidance in respect of DBRS' opinion regarding the outlook for the rating in question, with rating trends falling into one of three categories - "Positive", "Stable" or "Negative". The rating trend indicates the direction in which DBRS considers the rating is headed should present tendencies continue, or in some cases, unless challenges are addressed. In

general, the DBRS view is based primarily on an evaluation of the issuing entity itself, but may also include consideration of the outlook for the industry or industries in which the issuing entity operates.

The Corporation's debentures rating of A (high) is the fifth highest of twenty-six ratings used by DBRS for long-term debt. Long-term debt rated "A" is of good credit quality. The capacity for the payment of financial obligations is substantial, but of lesser credit quality than that of "AA" rated entities. Entities in this category may be vulnerable to future events, but qualifying negative factors are considered manageable.

The Corporation's preferred shares rating of Pfd-2 (high) is the fourth highest of sixteen ratings used by DBRS for preferred shares in Canada. Preferred shares with a Pfd-2 (high) rating are of satisfactory credit quality, and protection of dividends and principal is still substantial, but earnings, the balance sheet and coverage ratios are not as strong as Pfd-1 rated companies. A Pfd-2 rating generally corresponds with companies whose senior bonds are rated in the "A" category.

(b) Standard & Poor's Ratings Services

An S&P issuer credit rating is a forward-looking opinion about an obligor's overall financial capacity to pay its financial obligations and focuses on the obligor's capacity and willingness to meet its financial commitments as they come due. It does not apply to any specific financial obligation, as it does not take into account the nature of and provisions of the obligation, its standing in bankruptcy or liquidation, statutory preferences, or the legality and enforceability of the obligation.

In contrast, an issue rating relates to a specific financial obligation, a specific class of financial obligations, or a specific financial program. The rating on a specific issue may reflect positive or negative adjustments relative to the issuer's rating for (i) the presence of collateral, (ii) explicit subordination, or (iii) any other factors that affect the payment priority, expected recovery, or credit stability of the specific issue.

Since there are future events and developments that cannot be foreseen, the assignment of credit ratings is not an exact science and, for this reason, S&P ratings opinions are not intended as guarantees of credit quality or as exact measures of the probability that a particular issuer or particular security issue will default. Instead, ratings express relative opinions about the creditworthiness of an issuer or credit quality of an individual issue, from strongest to weakest, within a universe of credit risk.

Most ratings may be modified by the addition of a plus (+) or minus (-) sign to show relative standing within the major letter rating categories. An S&P rating outlook assesses the potential direction of a long-term credit rating over the intermediate term (typically six months to two years). In determining a rating outlook, consideration is given to any changes in the economic and/or fundamental business conditions. An outlook is not necessarily a precursor of a rating change or future credit watch action.

An S&P issuer rating usually refers to the issuer's ability and willingness to meet senior, unsecured obligations. The Corporation's S&P issuer rating is A. The Corporation's debentures' rating of A is the sixth highest of twenty-two ratings used by S&P in its long-term issue credit rating scale. A long-term debenture rated "A" is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher-rated categories; however, the obligor's capacity to meet its financial commitment on the obligation is still strong.

The S&P Canadian preferred share rating scale serves issuers, investors and intermediaries in the Canadian financial markets by expressing preferred share ratings (determined in accordance with global rating criteria) in terms of rating symbols that have been actively used in the Canadian market over a number of years. There is a direct correspondence between the specific ratings assigned on the Canadian preferred share scale and the various rating levels on the global debt rating scale of S&P. The Canadian scale rating is fully determined by the applicable global scale rating, and there are no additional analytical criteria associated with the determination of ratings on the Canadian scale. It is the practice of S&P to present an issuer's preferred share ratings on both the global rating scale and on the Canadian national scale when listing the ratings for a particular issuer.

The Corporation's preferred shares' rating of P-2 (High) on S&P's Canadian national preferred share rating scale corresponds to BBB+ on S&P's Global preferred share rating scale. A P-2 (High) rating is the fourth highest of eighteen ratings used by S&P in its Canadian national preferred share rating scale. Correspondingly, a BBB+ rating is the sixth highest of twenty ratings used by S&P in its Global preferred share rating scale. A preferred share rating of BBB+ exhibits adequate protection parameters; however, adverse economic conditions or changing circumstances are more likely to lead to a weakened capacity of the obligor to meet its financial commitments on the obligation.
